CATEGORY CARD COLORS

Journal

Peach — short form writing

#f7e7dd

Essays

Blue — long form writing

#dcebf3

Research

Golden — research threads

#f3e9cb

A post's card color comes from its category: Journal is peach, Essays is blue, Research is golden. Every post belongs to exactly one category.

TYPOGRAPHY

HEADING — LIBRE BASKERVILLE

The quiet architecture of attention

CARD TITLE — LIBRE BASKERVILLE, NORMAL WEIGHT

Letters no one will read

BODY — IBM PLEX SANS, REGULAR

A short observation on weather, soil, or the way light moves across a room in late October.

CAPTION / META — IBM PLEX SANS, SMALL

Edit with Lovable

BENTO CARD SIZES

Small

1×1 — compact entry

one column

Large

2×2 — featured post

spans 2 columns on desktop

Wide

2×1 — horizontal image + text

spans 2 columns on desktop

Medium

1×2 — tall, prominent image

one column

The homepage arranges cards in an irregular grid — large and wide cards give featured posts more room, medium cards stretch vertically with a prominent image, and small cards stay compact. All cards share a subtle scale-and-shadow hover. On mobile the grid collapses to a single column.

/post/:slug	**Post** Single post page with cover image and formatted content
/about	**About** Bio and work history timeline
/docs	**Documentation** This page — styles and structure reference

CONTENT WORKFLOW

Edit with Lovable ×

1. New posts are written on Substack and imported automatically once a day into the site's database.

2. Each import lands in *Journal* by default; Substack tags matching *Essays* or *Research* map the post to those categories instead.

3. The homepage and category pages always show live posts first; the placeholder cards only appear if the database is empty.
